

CONTROL CABINETS & CABLE ASSEMBLY

Always the
right connection

Quality Standard: All products are subject to an extensive quality test in the final inspection phase. Of course, we are certified according to current industry-specific standards.

CONTROL CABINETS & CABLE ASSEMBLY CUSTOMIZED SOLUTIONS

PRODUCT INFO

We offer you all services from a single source, from contacting to the assembly of cable harnesses and control cabinets as well as mechanical solutions.

Co-engineering for system – solutions, new and further development of project studies, prototype construction or series production – we are at your side as a system supplier.

APPLICATION AREA

Our manufacturing competence includes the following industries:

- Railway
- Automotive
- Commercial vehicles
- Measuring technology
- Construction machinery
- Mechanical and plant engineering
- Agricultural technology
- Medical technology

SERVICE RANGE

We are specialists from prototype to medium volume segment. These are the products we integrate into your system:

- Cable kits
- Cable harnesses (various versions)
- Assemblies (various versions)
- Control cabinets
- Grounding cables
- Driver's desks
- Energy chains

CONTROL CABINETS & CABLE ASSEMBLY INFORMATION

Cable assembly

Product info

Tailor-made solutions for complex tasks, the highest quality standards and satisfied customers – that is our number 1 priority.

- Standard and special assemblies
- High availability for fast action
- Wide range of materials, sheathing and connector types available
- Sample and prototype construction

Control cabinets

Product info

The assembly of control cabinets is carried out individually according to customer requirements. We are happy to support you starting in the design phase of your product. Our services include the following: Planning, identification, procurement, assembly and wiring of the parts and components

- Creation of bill of materials, wiring diagrams and documentation
- Production of cable harnesses and connection lines
- Electrical test of the wiring
- Functional test of the assemblies and control cabinets
- Selection and assembly of the mechanical components

MANUFACTURING CAPABILITIES

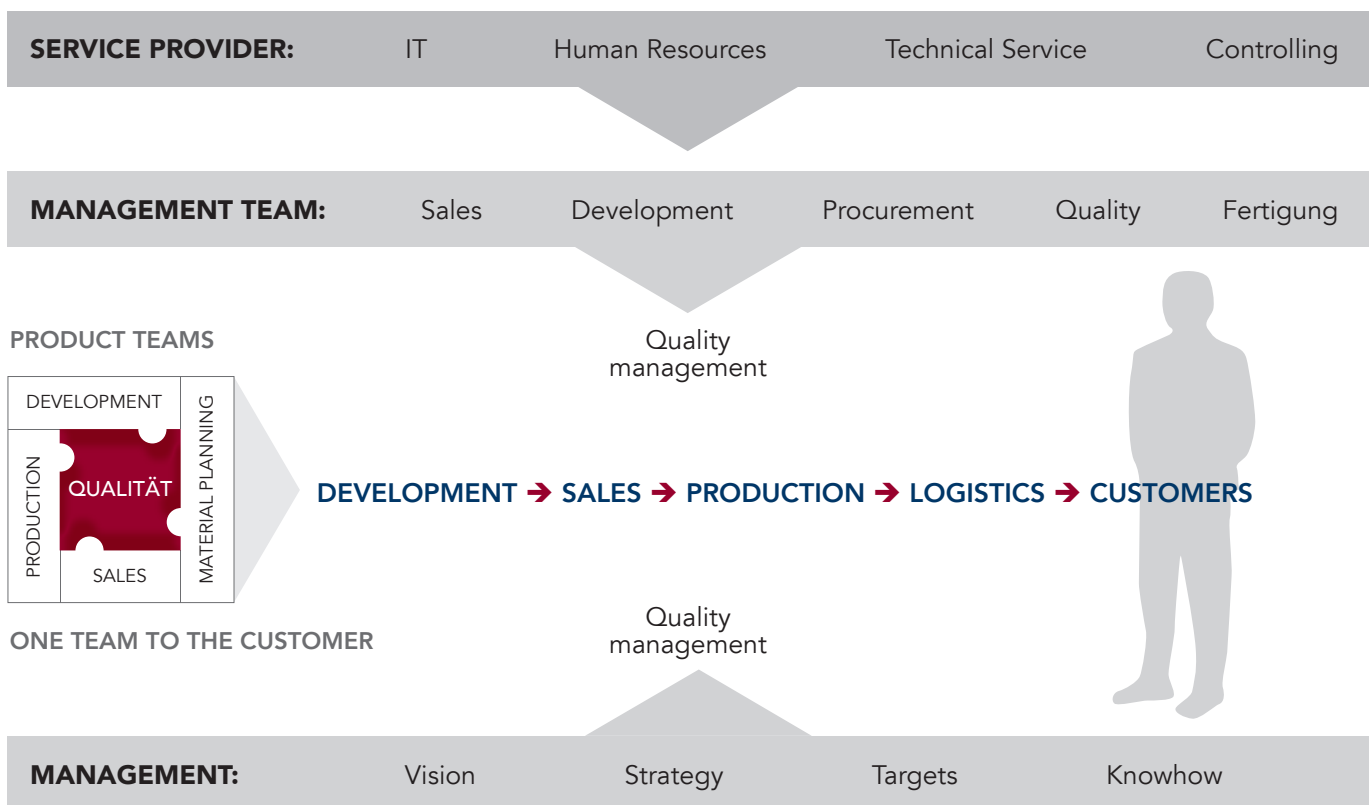

| SPECIFICATION | DESCRIPTION | VALUES & DATA |
|----------------------------------|--|--|
| Sheathing | Corrugated tube Braiding Bandaging Insulating / Protective hose Customized requirements | All standard diameters Up to diameter 30 mm All diameters All Standard diameters |
| Production methods | Crimping Insulation displacement technology Overmolding by hotmelt Casting with epoxy resin Resistance welding Ultrasonic welding | 0.14 mm ² to 240 mm ² All standard materials Connectors and components Pouring and sealing of housings 0.5 mm ² to 6 mm ² Up to 14 mm ² , copper wires |
| Sheet metal working capabilities | Welding Punching & bending Milling & turning Coating Soldering & annealing | Certification level CL1 according to DIN EN 15085-2 All common materials All common materials Powder coating, electroplating Soft & hard soldering |

SYSTEM SOLUTIONS FROM A SINGLE SOURCE

Customer-oriented process organization

A team is at your disposal to develop individual solutions according to your requirements.

Customer promise

Internationality

With 7 locations on 4 continents - more security for you!

Relocation expertise

We manufacture where it is most economical for you.

Development expertise

We develop customized solutions for you.

High level of vertical integration

For guaranteed flexibility and fast prototype production.

Many years of experience

We combine about 90 years of experience with the latest technologies!

Service

Whether engineering, design-to-cost workshops or after-sales service – we support you!

MORE BENEFITS FOR YOU:

- Punctuality
- Consistently high quality all over the world
- Comprehensive service wherever you are in the world
- Years of expertise for your product
- International presence
- On-site engineering service – from prototyping to after-sales
- Original manufacturer
- A team just for you
